Agile is a set of values
which describe how people should work with each other

```
graph TD; Openness([Openness]) --> Agile([Agile]); Honesty([Honesty]) --> Agile; Trust([Trust]) --> Agile; Courage([Courage]) --> Agile; Money([Money]) --> Agile;
```

The Agile Manifesto

People and Interactions	Tools and Processes
Working Software	Extensive Documentation
Working with the Customer	Contract Negotiations
Reacting to Change	Following a plan

© 2008 Peter Stevens sierra-charlie.com

“Lean” is collection of universal principles,
which can be applied to any business situation.

© 2008 Peter Stevens sierra-charlie.com

Scrum is a rigorous management practice, which helps companies implement agile values and lean principles.

Today I ask you the questions

Photo © leonardo viti - fotolia

© 2008 Peter Stevens

sierra-charlie.com

Questions

- Which principles complement each other well between Scrum and OSS?
- Which practices will be the most difficult to adopt or biggest challenge in an OSS situation
- Which agile practices are you already using in your OSS project?
- How do you see the role of Product Owner, Scrum Master or Team in an OSS Project?
